

Dear Sir / Madam,

We would like to point out that KROHNE (and perhaps other manufacturers) have already incurred significant development costs for the use of frequencies in the 25.5- 27 GHz bands for our new process level and measuring equipment soon to be released. We ask that the FCC make it clear that by adopting the proposed allocations it is in no way preventing compliant Part 15 operations in these bands for products similar to ours.

Thank you in advance.

Sincerely,

R. Loisel
KROHNE, Inc.
